Visulytix presents at Artificial Intelligence roundtable

(Left to right) Theresa May, Prime Minister of the UK; Narendra Modi, Prime Minister of India; Noel Gordon, Chairman, NHS Digital and Jay Lakhani, CEO, Visulytix

Visulytix were delighted to take part in an Artificial Intelligence (AI) in healthcare roundtable event at The Francis Crick Institute, London, on Wednesday 18th April 2018. The roundtable was followed by a live demonstration to Theresa May and Narendra Modi in which Jay Lakhani, CEO of Visulytix, presented Pegasus, Visulytix's AI decision support tool for Ophthalmology. Visulytix was one of two companies selected to demonstrate their AI solutions to the Prime Ministers, alongside Babylon.

The roundtable was attended by senior officials from India and the UK with the objective to identify pilot sites, solution areas and implementation mechanisms to take forward the proposed UK-India Healthcare AI collaboration. The roundtable was chaired by Noel Gordon, Chairman of NHS Digital.

Following the event, Jay Lakhani commented: "We were honoured to be invited as key opinion leaders to the roundtable discussion and to be given the opportunity to showcase Pegasus, our AI decision support tool for Ophthalmology. India has some extremely ambitious healthcare programmes and we were delighted to be a part of the discussions of how the UK and India can collaborate going forward."
